

GALVANIZING PLANT

Havy Engineering Industries & Shipbuilding Co. K.S.C. (Public) (HEISCO) - has built an environment-friendly and state-of-the-art Galvanization plant to cater to the requirements of its various clients and customers for oil & gas, petrochemicals, infrastructure, electrical, power and water sectors. Based in Shuaiba industrial area, we operate the most highly automated galvanizing plant with the lowest emissions of any hot dip galvanizing plants in Kuwait.

Corrosion protection is important in the world of steel and iron. Galvanization or galvanizing is one of the best forms of corrosion protection. It is the process of applying a protective zinc coating to steel or iron to prevent corrosion. HEISCO offers hot-dip galvanizing service to a wide variety of steel components ensuring the best service and quality possible.

Low emission and best possible protection for people and environment

Our advanced equipment and the environment-friendly technology are capable of galvanizing steel components in large scale. Our automated material-handling and processing equipment and remote controlled dipping system deliver a consistent coating for a long-life protection against corrosion.

Automated material handling

Low price and quick service

Galvanized items transported to customers or directly to the site
